Teaching and learning methods

Type of teaching-learning method

Teacher centered

Short summary

Oral communication method, used to explain a topic / activity in detail over a longer period of time.

Description

The lecture usually combines presentation, explanation, and illustration, or it can appear as a stand-alone method. It is worth applying to communicate and introduce new knowledge and to arouse interest.

The challenges, pitfalls of the method and ways to deal with them

During the performance, students are forced to follow the pace of the performer.

Practical application tips

It should be presented in a good audible way, students should be able to take notes, it is worth making a presentation.

It consists of three main parts:

1. Introduction: establishing a teacher-student communication, raising awareness, communicating knowledge
2. Explanation: presentation of a topic, it is necessary to maintain the attention of the students, it is necessary to strive for a clear explanation
3. Summary: summarizing what has been said, providing a question-and-answer opportunity, highlighting important information, linking it to the following parts of the curriculum
